SUMMARY

Full-stack developer with experience building production-oriented web applications, including an AI-assisted learning platform and a data-backed visualization product. Comfortable across the stack: React and Next.js on the front end, Node.js and Express on the back end, and PostgreSQL via Supabase. Strong foundation in Python, Java, and C++, with practical use of analytics workflows and large language model APIs for product features.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C++, SQL

Front end: React, Next.js (App Router), Vite, Tailwind CSS, HTML/CSS, responsive UI

Back end & data: Node.js, Express.js, REST APIs, Prisma ORM, Supabase (PostgreSQL)

AI & tools: Google Gemini API, OpenAI API, Vector RAG, React Flow, Framer Motion, Git, GitHub

EXPERIENCE

Dyashin Technosoft — Python & Data Analytics Intern **Feb 2025 – Mar 2025 | Bengaluru, Karnataka**

- Deliver Python-based analytics, automated data transformations, and supporting workflows in a client services environment.
- Coordinate with stakeholders and cross-functional peers to clarify technical requirements and ship maintainable solutions.

PROJECTS

RepurposeAI — AI Content Repurposing SaaS **repurposeai-rp.vercel.app**

- Architected a multi-platform content engine converting YouTube URLs, articles, and audio into LinkedIn carousels, X threads, and scripts.
- Implemented structured generative pipelines with Google Gemini API, Next.js 15, TypeScript, Tailwind CSS, and Prisma ORM.

Smart Learn — AI-Powered Learning Platform **smart-learn-web.vercel.app**

- Built an AI study platform supporting multi-format ingestion (PDFs, media, URLs) with conversational tutoring, flashcards, and quizzes.
- Implemented Vector RAG retrieval with Supabase and Gemini/OpenAI APIs for grounded, context-aware student assessments.

Resume Roaster — AI Resume Analyzer & Roaster **resume-roaster-ro.vercel.app**

- Developed an AI-driven resume reviewer providing actionable ATS critique, section audits, and humor-infused roast reviews.
- Built an Express.js backend with multi-provider LLM fallback (Gemini/OpenAI) and automated document parsing via pdf-parse.

Kinship — Interactive Family Tree Platform **familytree-livid.vercel.app**

- Engineered an interactive infinite lineage canvas using React Flow with custom spouse junctions, sibling alignment, and PDF export.
- Integrated Supabase (PostgreSQL) backend for graph data persistence, auth, and state management with Framer Motion animations.

EDUCATION

Dayananda Sagar University **Oct 2025 – Present**
Master of Computer Applications (MCA)

Christ Academy Institute for Advanced Studies **Aug 2022 – May 2025**
Bachelor of Computer Applications (BCA)

CERTIFICATIONS

- Certified Secure Computer User (CSCU) — EC-Council
- Internship Certificate: Python & Data Analytics — Dyashin Technosoft, Bengaluru
- Artificial Intelligence — Infosys Springboard
